## Career Objetive

I'm a Front-End/Web-Designer with growing experience in web and app developing. My aim is to focus in creating accessiblity friendly projects, and expanding my programming knowledge.

## Projects

### *Photography Portfolio*

. Create a web-portfolio using html, css and javaScript.
. It shows the artist work, the about them and contact page.

### *Login*

. Created a login page with html and css to improve my animation skills.

### *Dating site*

. Create a dating page site using BookStrap.

### *Game*

. Built a Game with html, css and JavaScript.
. Use javaScript to discover the mistery number and to restart the game if the user got the number wrong.

### *Luna To-Do*

. Built a To-do list application with quasar and vue.js.

### *Celiac - In progress*

. Creating a celiac app, with a fullstack team.
. The app allows the user to search for gluten free products, restaurants and  information. It also has social media.
. Created a search engine that finds products from a backend Api.

## Education

. The Complete Web Development Bootcamp By Dr. Angela Yu

. The complete JavaScript Course: From Zero to Hero By Johnas Schmedtmann
